

INTERMEDIATE NONWOVENS TRAINING COURSE

Dive deeper into the world of nonwovens

"I learned a lot over these past few days and hope to take it on to the next stage of my career. This is a highly recommended class for anyone involved in any aspect of nonwovens".

- Jeffrey Dapaah, Nice Pak Products

Designed for industry professionals with nonwovens experience or a technical background, this new 3.5 day course is a bridge between INDA's Elementary Nonwovens Training Course and the Advanced Courses of the Professional Development Series. Attendees will learn how to select the correct technology to meet product performance and attribute requirements. The course includes the fundamental chemical and physical make up of nonwovens, the properties of materials used in making them, and the manufacturing processes used to produce them.

The curriculum includes demonstrations of processes at The Nonwovens Institute on the campus of NC State University, at their state-of-the-art pilot lines and analytical characterization labs. Both INDA and NWI instructors will lead the class, with select guest speakers contributing to educational content. A Bachelor of Science degree in engineering, textiles, or five years of relevant experience in nonwovens is recommended. This educational course is aimed at making professionals and their organizations more successful by providing:

- Advanced nonwovens knowledge
In-depth understanding of processes, technologies, chemistries, and raw materials
Expanded business options for branded and private label products
Enhanced professional and personal growth

3.5 DAYS

INDA/NWI Members: \$2,450
Non-members: \$3,495

WHEN*

February 27-March 2, 2018
July 10-13, 2018
October 23-26, 2018

WHERE
